Detailed action

Claims 1-27 are pending in this application.

Double Patenting

35 U.S.C. 101, Statutory Basis for Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter.

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-27 of prior U.S. Patent No. 5,811,412. This is a double patenting rejection.

Art Unit: 1609

3. Claims 26 and 27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 12 and 13 of prior U.S. Patent No. 5,064,821. This is a double patenting rejection.

4. Claims 20 and 21 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 and 2 of prior U.S. Patent No. 5,589,470. This is a double patenting rejection.

35 U.S.C. 101, non-statutory Basis for Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1609

Claims 1-10, 13-19, and 22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2, 4-7 and 12 of U.S. Patent No. 5,064,821 (made of record in the IDS filed on 11/12/2004). Because the instant claims fully encompass (are anticipated by) the previously patented claims.

Claims 8, 11-18, 20-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 and 11-16 of U.S. Patent 5,589,470 (made of record in the IDS filed on 11/12/2004). Because the instant claims fully encompass the previously patented claims.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the inventions overlap and are fully encompassed by the instant claim. Therefore, the obvious type double patenting rejection is deemed proper.

Conclusion

Claims 1-27 in the present application are rejected for reasons explained above.
